POLARIS Laboratories™ Expands Training Curriculum with Advanced Data Interpretation Class

FOR IMMEDIATE RELEASE

INDIANAPOLIS, IN - POLARIS Laboratories, a leading provider of fluid analysis services in North America, has expanded its training curriculum to include advanced instruction on data interpretation. The laboratory will host 6 oil analysis and cooling system maintenance classes across the United States and in Edmonton, Canada, throughout 2009. The courses provide maintenance and reliability professionals with the management tools necessary for developing practical fluid analysis programs that have positive impact on a company's bottom line. The following classes will be held throughout the coming year:

Las Vegas

February 2009

Cooling Systems - February 16

Oil Analysis - February 17-18

Houston

March 2009

Cooling Systems - March 9

Oil Analysis - March 10-11

Salt Lake City

April 2009

Cooling Systems - April 6

Oil Analysis - April 7-8

September 2009

Cooling Systems - September 14

Oil Analysis - September 15-16

Indianapolis

June 2009

Cooling Systems - June 9

Oil Analysis - June 10-11

Advanced Data Interpretation - July 29

Edmonton

July 2009

Cooling Systems - July 14

Oil Analysis - July 15-16

PRESS RELEASE

Taught by experienced industry professionals, these classes focus on fluid analysis program goals, appropriate testing, selecting a quality laboratory, taking good, timely samples and interpreting results. Anyone responsible for maintaining equipment reliability within virtually any industry should plan to attend, including equipment operators, maintenance managers, industrial engineers, operations managers, lubrication engineers, maintenance technicians and reliability engineers.

Classes held in markets where POLARIS has laboratories will include an extensive laboratory tour to give participants a first-hand look at the laboratory process and familiarize them with both testing equipment and methodology. Whether you are just venturing into fluid analysis, or have been managing maintenance programs for years, these courses will expand your general knowledge of oils and coolants and provide a better understanding of just how important fluid testing and analysis is to equipment reliability.

Private sessions may also be scheduled upon request by contacting Sara Callahan, Marketing Coordinator, at POLARIS Laboratories™ toll free at (877) 808-3750 or by submitting a request for a quote at <http://www.polarislabs1.com/private-training-form.php>

POLARIS Laboratories™ provides complete testing and analysis for used oils, fuels, coolants and water-based industrial fluids. Its customer base is diverse with heavy emphasis on the mining, construction, industrial, transportation and power generation industries. Experienced data analysts and knowledgeable technical field support are the backbone of the company's solid commitment to superior customer service. A proven leader in the oil analysis industry, POLARIS is known for consistently providing high quality data, fast turnaround times, and knowledgeable technical support. Education and effective communication are POLARIS' cornerstones for building strong customer relationships and long-term success.
